**Eurocontrol Successful Upon Appeal to Turkish
High Council Supreme Court**

Company to Pursue Reinstatement of Fuel Marking Contract

Toronto, Ontario, Canada, September 5, 2006: Eurocontrol Technics Inc. (TSX Venture: EUO), a company specializing in the acquisition, development and commercialization of innovative authentication and verification technologies today announced the successful outcome of its subsidiary, Global Fluids International S.A. (GFI) appeal to the Turkish High Council Supreme Court.

On March 10, 2006, Eurocontrol/GFI announced they would appeal a judgment rendered by the Turkish Supreme Administrative Court denying the company an injunction action against Turkey's Energy Market Regulatory Authority ("EMRA") in the matter of a national fuel marking tender awarded to GFI by EMRA announced on November 14, 2005.

The Company's Turkish legal counsel has advised that the High Council Supreme Court in Ankara has approved the injunction request by GFI, which had previously been denied by the Turkish Supreme Administrative Court. As a result of the injunction, the following events are expected: The return by EMRA of the 500,000 Euro bid bond to the account of GFI at the issuing bank Oyak Bank, Ankara, Turkey and the nomination during September 2006 of a technical expert on behalf of the Court to verify the claim of the Turkish National Laboratory Institution (TUBITAK) that the GFI system complies with the tender's requirements.

"The expert's anticipated positive report should lead to the reinstatement of the national marker contract with GFI, the value of which could be as much as US\$20 million annually over the two year term," stated Bruce Rowlands, President & CEO of Eurocontrol. Mr. Rowlands added: "We are very pleased with the result of our appeal to the Supreme Court in Ankara and we look forward to working with EMRA to launch this important national marking program in Turkey in the near future."

About Global Fluids International (www.gfi-petromark.com)

Founded in 2001, Global Fluids International S.A ("GFI") is one of the world's pioneers in developing and implementing innovative marking systems for the oil industry.
