FOR IMMEDIATE RELEASE

Eurocontrol's Petromark™ Receives ISO 17025:2005 Accreditation

- System Meets Both Technical Competence Requirements and Management System Requirements -

Toronto, Canada, May 10, 2007: Eurocontrol Technics Inc. (TSX Venture: EUO), a Canadian public company specializing in the acquisition, development and commercialization of innovative authentication and verification technologies, through its wholly owned subsidiary Global Fluids International S.A. (GFI), today announced that GFI has received internationally recognized ISO 17025:2005 accreditation for the Company's Petromark™ mobile laboratory.

ISO is an international family of generic quality standards, originally published by ISO (International Organization for Standardization) in 1987, updated in 1994, and again in 2000. It has currently been adopted by over 100 nations. It has been embraced by the European Union and by the U.S. and has been accepted by the U.S. Department of Defense and NASA, and has been incorporated into FDA and NATO standards. It is also the foundation for many industry-specific standards. GFI was assessed by the Israel Laboratory Accreditation Authority (ISRAC) in meeting these international standards.

"This accreditation demonstrates GFI's technical competence and validates our Petromark™ hydrocarbon marking and testing technology to be of the highest standard of international recognition," stated Bruce Rowlands, President and CEO of Eurocontrol Technics. "This is important to our customers in showing our capabilities to consistently deliver technically competent test results and calibration in tracking our customers' oil flows with our Petromark™ marking technology solution," added Mr. Rowlands.

Eurocontrol's innovative Petromark™ solutions address two major problems in the oil industry – combating the trade in illicit fuels and providing brand protection for large oil companies. As the price of oil has increased substantially, such problems have become a higher priority for government and corporate officials to address.

About Eurocontrol Technics Inc.

Eurocontrol Technics Inc. through its wholly owned subsidiary Global Fluids International S.A. ("GFI") is one of the world's pioneers in developing and implementing innovative molecular marking systems for the oil industry. Through its proprietary Petromark™ integral system, GFI has developed a 4-part solution consisting of a molecular marker, injection, monitoring and control components. Such oil industry cost realities along with GFI's 5-year R&D efforts to create its industry-leading marking solutions, along with access to capital provided by Eurocontrol Technics Inc. allows management to pursue numerous anticipated oil marking opportunities in fiscal 2007 and in years to come.

Forward-Looking Information

Certain statements contained in this news release may contain forward-looking information within the meaning of Canadian securities laws. Such forward looking information are identified by words such as "intends," "expects," "believes," "may," "will" and included, without limitation, statements regarding the company's plan of business operations, prospects, anticipated revenues, and projected expenditures. There can be no assurance that such statements will prove to be accurate; actual results and future events could differ materially from such statements. Investors are cautioned not to put undue reliance on forward-looking information. Except as otherwise required by applicable securities statutes or regulation, the company expressly disclaims any intent or obligation to update publicly forward-looking information, whether as a result of new information, future events or otherwise.
